

AI-Assisted Retinal Screening Report

Image: SYNTHETIC-EXAMPLE-001 | Status: COMPLETE

SCREENING SUMMARY

Quality: BORDERLINE

Prediction: Moderate (Grade 2)

Calibrated confidence: 0.81

Referable probability: 0.83

Workflow: REFER [HIGH]

WORKFLOW

REFER (HIGH)

- REFERABLE_DR_PREDICTION
- HEMORRHAGE_EVIDENCE
- HARD_EXUDATE_EVIDENCE

LIMITATIONS

- This is an AI-assisted screening tool.
- It is not a standalone diagnostic system.
- Algorithmic lesion evidence is not clinically confirmed.
- Confidence values do not represent clinical certainty.
- Dataset performance may not generalize to rural clinical deployment.
- Human review remains necessary for escalated/uncertain cases.

Screening support only – not a diagnosis. Lesion evidence is heuristic; confidence is not cl
